Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:

A great class. Always interesting. Not a struggle to stay awake. Looked forward to class. Michael Guy was undoubtedly the most accessible prof that I have ever had. Took a genuine interest in my progress. Not so much focus on my grades but my understanding the material- which made me feel less like a math dummy.

Despite his inexplicable rejection of the FairTax, Guy was a great professor. He was always available for questions and his method of teaching made class fluent and interesting.

He really made this course interesting. I enjoyed him as a person and a teacher. The atmosphere was relaxed but understood that it was for learning and listening. He was awesome!

I liked the class a lot...this teacher prepared us very well for quizzes and tests.

instruction was boring at times
did not clearly answer students questions

Maybe it is just that the material isn't interesting to me.

Micheal was always well-prepared and did a great job of getting the material across without confusion. The only thing I would liked to have been different was the project...I feel like it would have been more useful had we had to complete prior to being tested on the material...Because it was after the test, it felt nearly pointless. Other then that! I loved this class-He made it very interesting and fun!

Mr. Guy was an extremely efficient and effective teacher. He made learning a very clear process and was always helpful. I truly detest math but never dreaded coming to his class.

Sometimes confusing when he taught, but showed that he wanted his students to succeed, so would repeat material covered often. Grading was very fair, as was his tests, quizzes, and projects.

Soooooo boring. Could not pay attention. Really random.

this was the most amazing math teacher i have ever had. made class interesting. no attendance pol. but i still came to every class. the first time i have ever passed a math class. explains things. i hope to take him again. great teacher!
