10. Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:

Didn't like answering questions very much.

Good teacher, made class more enjoyable

He always seems eager to help and is very informative. He knows the program like the back of his hand and it shows.

He didnt create enthusiasm for the program or what it could do. Instead it seemed that if we werent mathematics majors he didnt think we needed to have much of an understanding of it.

He spoke english!

he's great

He's really nice and knows what he is doing.

i loved him! he is a great guy and a great teacher.

Instructor created an enjoyable fun classroom environment. Excellent job

The instructor did not seem interested in teaching the class and this translated into my own lack of enthusiasm for the course. He always answered our questions, but sometimes he was short and curt in doing so. However, he did seem to have solid knowledge of Maple.

The teacher graded fairly, offered plenty of help both with maple and the actual math, and was friendly and polite.

The teacher was great and very helpful, but i found that the lab in general was pointless and didn't help my understanding of the material.

This was my best instructor yet!

was very willing to help and knowledgable in maple
