

## **What did you like best about this class?**

- Board were presented as viewable via monitor challenging professor is understanding and accommodating
- I learned how to calculate interest compound interest and annuities. These are most useful for me.
- Explanations were good. He is funny. Exams are closely related to course content.
- What I liked about the class is that the teacher thoroughly explains the topic.
- The class had taught me a lot and at times it was fun.
- My professor has this funny sense of humor that I actually thought was quite humorous. This makes it a fun learning time because I wouldn't really fall asleep.
- I thought the study guides and class time helpmates prepare for exams well.
- The professor is very interesting provides lots of information during class.
- The glass is very fun and entertaining. The class is very practical and straight to the point.
- Prof. Guy explains the math theory in ... very detail ways.
- The class was awesome in general. I love the style of the professor. He makes math fun, and enjoyable.
- The class was challenging but the teacher made you understand everything.
- I like this class that the instructor was very nice guy, and the way he taught us were make us really understand the topic.
- About the class I love the fact that Prof. G. Michael Guy explains the material in a very clear away and spends class time very, very efficiently.
- That it really help me a lot to do better in math.
- Instructor provided very clear and understandable objectives for the class. Instructor's explanations are very clear too.

## **Would you or would you not recommend this instructor to a friend? Why?**

- I would recommend the instructor. Seemingly life full, with dry humor. Not a 'fun' class, but if required, would recommend Guy.
- Yes.
- Yes, he is funny. There is no pressure being his student.
- I would recommend this instructor to a friend because he can actually teach and not speed through each section while nobody understands a topic. We make sure everybody understands.
- Yes, I learned a lot. He explains everything clearly.
- I would recommend this professor to a friend because he's rather well-organized and clear his explanation of the topic. I learned a lot!
- I would and did recommend G. Michael to a friend. He provides very clear objectives of the course and uses the time wisely. Best thing is he is really fun. Make the class fun.
- I would highly recommend this instructor because he explains things simply and clearly.
- I will recommend them to my friends because he is a very nice person and his classes interesting.
- Yes I would.

- I will recommend the class to friend.
- Yes. Because he knows how to get a point across, and teach people math.
- Yes. You can actually learn something in the class.
- Yes, because he is a good teacher.
- I have already recommended Prof. Guy to all my friends because he is an excellent professor. In fact, I am the one that does not learn easily but he is great.
- I would recommend this instructor to my friend because he is cool and fair to every student.
- I will recommend this instructor to my friend.

## Comments:

- Increased my knowledge at a rate of two points per class, while x=1 arrived on time.
- He makes the class more interesting.
- He make students laughed.
- The quizzes are harder than the test.
- You're a great professor! Wish you teach me math 261 as well.
- Thanks. Love your class is really helpful. Learn a lot. And fun at the same time looking for to have you again next semester.
- Also entertaining which keeps me focused.
- Please make your test harder especially the bonus of the test.
- I picked up my math skills after passing with a C. in math 120. This class gave me a better understanding of the previous math classes I took. Thank you very much professor. I'm a better math student now.
- I understand Prof. tries to explain the reasoning of certain math formulas and details to students can understand it instead of try to ... however, I sometimes feel like that he goes over to details and basic. It is math when it comes to the end, sometimes it does require a student to put effort in themselves to understand it. Don't keep teaching them.
- Keep up the good work prof!!
- I am very enjoy the time that I had to attend this class because learn a lot stuff from it.
- Thank you for spending time teaching us! He is one of my favorite math teachers until now and I like the way he joke in class.
- Instructor required a lot of quizzes but those quizzes helped me a lot to prepare for the exams. That is not a bad idea at all.
