

What did you like best about this class?

- He was also HILARIOUS. But he made everything easy, and how different ways to solve problems for the book.
- The thing that I like most about this class is the way he teaches the math, he makes it clear and concise for me, so that it's easier for me to do my homework.
- I like that the teacher was really fair with how many quizzes he gave, but just topics on the test were somewhat different from the homework.
- Instructor makes everything easy to follow and actually fun to learn.
- Explain very clearly.
- The teachers humor and wit. He made it easy to expand my knowledge towards the curriculum.
- The detailed excavation of the material in his ability to teach from his head unlike other professors who reads from the textbook.
- Nothing.

- The professor used many examples, to help other students in class.

- Yes. I would recommend this instructor to a friend because he will explain in detail what you do not understand. You should keep up the good work, there is no professor for precalculus that teaches as you do. Thank you prof.
- Sure. You can tone it down with the sarcasm and sorry you're too dorky to be funny.
- I would definitely recommend this instructor to a friend because at first I was truly afraid to take him Ma 440 because I thought I was bad at math but the professor made it so easy to understand. Prof. Guy is very nice, I had to drop another Ma 440 because it was hard to understand but he made it clear. Some jokes were a bit rude but still funny!!
- I would recommend this professor because he knows exactly what he wants to teach. Professor you should consider letting students do some problems during class, so when they go home and won't have much trouble doing the homework.
